

Denham

DJ

Denham is entering his first season with the Storm.

He is a South Dakota grown pop musician that's been making some racket in the Midwest. Living in an area where Country and Rock are the predominant genres, Denham's versatility and unique sound has landed him on some of the largest stages our area has to offer. Coming off his first tour last November, Denham has seen a decent level of success despite his late start in his music career. At 23 years old, after attending school at North Dakota State University, the Aberdeen native moved to Sioux Falls in hopes of pursuing a life of music. Since then Denham has played over 200 shows in eight different states, and had his music played over half of a million times across all platforms.

Proudly partnering with the Storm, Denham's electric personality and high energy is set to bring a new element of entertainment to the game! "A dream without a plan is just a dream," Denham always says with his dreams of one day being an internationally known musician and opening up his very own school of music. Keep an eye on this kid and keep up with him on social media. Music available on all major music platforms!
